Re: PhishingBox Annual Renewal

The attached proposal is for a one year agreement with PhishingBox phishing and social engineering training software, for \$3,636.60 to be paid out of Technology Services budget.

This software enables Technology Services to provide Security Awareness Training and perform regular phishing tests on our users, as a method for ensuring all are aware of what to look for and how to avoid phishing, ransomware, and social engineering attacks. It is an industry standard product recommended by Cybersecurity professionals and Cybersecurity insurance firms.

Thank you,

Jessica Ramsey
Director of Technology Services
